Adolix Split Merge PDF Crack Free Registration Code [Win/Mac] 2022 [New]

What's New In Adolix Split Merge PDF?

Adolix Split & Merge PDF is a simple PDF editing tool that allows you to split and merge PDF documents. The program offers quite an extensive interface, letting you to select the PDF document that you wish to edit, choose how the document should be split and merged, select the number of pages and page range, or the output format (this last setting determines the layout of the split document).
The tool has been developed to be a lightweight tool and it does not consume a lot of system resources, thus it can be used on any machine with a single core processor or 2 or 3 cores.
As the name of this software implies, Adolix Split & Merge PDF allows you to cut and join PDF documents. It can be easily used by individuals of any experience level.
The interface of the application is plain and simple to navigate through. PDF documents can be imported into the list by using either the file browser or "drag and drop" method. In the queue you can check out the name, source path, number of pages and password of each file.
So, you can split files into a specific number of pages, by page range or by other methods, as well as specify the output destination and filename, in order to proceed with the splitting process. Merging files is similar. Plus, you can mix PDF documents and use the same settings as in splitting mode.
The straightforward application requires a very low amount of system resources, supports several languages for the interface, has a good response time, quickly finishes a task and manages to preserve the original layout of text, images and shapes.
We haven't come across any issues during our tests, since Adolix Split & Merge PDF did not freeze, crash or pop up errors. Unfortunately, the interface is outdated and there is no help file available. But, other than that, we strongly recommend Adolix Split & Merge PDF to all users.
Adolix Split & Merge PDF Features:

- Languages: English, German, French, Spanish, Polish, Russian
