

I am careful to use the term "teaching and learning system" to describe the set Finland has changed its traditional education system "into a model ... I can't find information about this. I know it's a new regime, so what does that mean. I don't know how to do it, so I'm just using this as a clue to find information. I assume it's called "experiential learning." But it has to do with the education system, as I said above. If I'm not mistaken, the term first appeared in the US in the early 2000s, and it is now becoming more common in European countries.

Thanks
