Details Free Translator is a small software application developed for helping you perform text translations between various languages by making use of the Google API engine. The translations are carried out successfully, provided that you have an active Internet connection. Clean feature lineup After a quick and simple installation process where you only need to press a few 'Next' buttons in order to complete the task, the tool reveals an intuitive design. Although you cannot appeal to a help manual, you can tweak the configuration settings on your own because they look easy to decode. Text translation capabilities Free Translator offers you the possibility to manually type in the text directly in the main window or paste the information from the clipboard. In addition, you are allowed to edit the text that you want to translate. You may cut, copy, or paste data, and undo or redo your actions. Preset hotkeys can be employed for faster actions. The utility offers support for various translation languages, such as English, French, German, Spanish, Italian, Greek, Japanese, and Chinese. A smart feature included in the package enables you to automatically detect the input language. Other important options worth being mentioned give you the freedom to pick the translation languages from drop-down lists, switch between the translation languages, copy the translated data to the clipboard so you can easily paste it into other third-party programs, make adjustments to the translated text in case you detect errors, as well as import/export data from/to a file on your computer. Tests have pointed out that Free Translator carries out a task quickly. It does not eat up a lot of CPU and memory resources so the overall performance of the computer is not affected.
