This is a soundtrack of Castle of Delights, a fantasy adventure game published by Sega in the late '80s and early '90s. It was never released as a commercial game. The game (pictured above) is actually an "internal Sega project". It was developed by Sega's music division and released as an internal Sega prototype. The soundtrack is the result of music and voice recordings made for a prototype of this game, and was never released as a commercial game. It was never even commissioned for a commercial release and became the subject of rumors that this was the soundtrack for an unreleased Sega product until a year or two ago. Sega was planning to release the soundtrack on a CD in the mid-1990s, but that was never done. I released a soundtrack CD for this game in 2013, but it contained only the first disc of this soundtrack (the one with more than 60 minutes of music) and some bonus tracks. To make the soundtrack available as a complete package, I combined both discs into this one. The soundtrack for this game has been composed and arranged by Enymsgame and performed by his band, Natural Selection, with the help of his brother, Enymsgame's friend, and a friend of his brother's. I sampled and re-edited most of the tracks as the original recordings were in a bad quality. Based on the transcripts of the game in Japanese, I re-translated the lyrics to English. I have inserted the texts into some of the tracks. If you like the soundtrack, and you are a fan of Sega's music division or fantasy games, you can also buy his albums. Credits: I would like to thank the contributors of the soundtrack: Danny Burges & David Vance, editors and writers of the Castle of Delights game, for the script. Enymsgame's band, Natural Selection, for the music and remixes. Mike Wilson for his fan-translated script of Castle of Delights, and for advising on my re-translation of the game. Enymsgame, for making available the first disc of his soundtrack in a commercial manner for the first time in history. Enymsgame, for making available the second disc of his soundtrack for the first time in history. Igor Ivanov, for doing the amazing cover art for this soundtrack. This soundtrack is not for sale. I don't plan to release it commercially. Also, this soundtrack

### **Free Ghost Watchers (Updated 2022)**

Twickles was originally designed for itch.io, the home of my other game BastionNova and will work there for the foreseeeable future. I am transitioning the game to an official release, but at a cheaper price. Game design and code for the game is entirely mine, and I am always open to feedback. If you like it, play it. If you don't, send me a message. Twickles is a puzzle game inspired by Fruit Ninja. published:14 Jun 2017 views:1460 I really like this game but there's just one thing. When she doesn't show up to her hospital bedding, her married lover starts questioning his sanity. Able to Hear describes itself as a thought-provoking, commentary-free film. However, its brief commentary track is exceptionally poor. Two people discuss the theme of the film—the very nature of faith, and questioning one’s own faith. The first person is a Christian minister, though his tone seems more critical and judgemental than appreciative. He seems to believe the focus of the film is on how he believes in God, while the second person, a Jew, did not recognize the theme of the film. He merely interprets the film as a story about the contrasts of a Christian and a Jew in modern America. The film is meant to present a wider perspective of faith and faith-like experiences, but the commentary only concerns those issues. The film is worth the watch, but it’s commentary is remarkably poor. published:21 Jun 2015 views:12373 A
